

# Numbering System

Treble Bridge

Bass Bridge

A numbering system is used to help players locate notes on the stringboard. The strings are numbered from the bottom of the dulcimer.... based on the Student Model (12/11) hammer dulcimer.....just count the strings from the bottom, up.

Strings on the BASS bridge are designated with a short line UNDER the number.

Strings on the RIGHT TREBLE bridge have no designation.... no line under, or over the number.

Strings on the LEFT TREBLE bridge are designated with a line OVER the number.
